

#### ABSTRACT OF THE DISCLOSURE

A battery-connecting member (1) has a base (2) for accommodating a fuse (10) and a casing (3) for accommodating the base (2). The base (2) includes a battery terminal (7), busbars (8A, 8B) and the fuse (10). A box-accommodating portion (15) is provided in the casing (3) for accommodating the fuse (10) and is provided with an operation space closing portion (17) at a side toward which the fuse (10) is detached. Thus, the fuse (10) cannot be detached unless the battery-connecting member (1) is detached from a battery (5) and the casing (3) and the base (2) are separated.
